To Whom it May Concern:

Gremada Industries, Inc. is pleased with our largest and latest building addition to our company built by Roers' Construction at our West Fargo Facility. They have also given us quick response to small, short notice projects which avert any stoppage of production.

We have been very pleased to work with Roers' and highly recommend their company for your building needs. Their work and customer service has been outstanding. Lance Ziebarth, COO is always responsive to our needs and Rick Roers, Field Superintendent assures that we receive quality workmanship in a timely manner.

I highly recommend Roers' Construction, Inc. for projects both large and small.

Sincerely,

Greg Butler
President/CEO
